Agenda

1. Introduction to HACCPAC Mobile
2. Overview of current process versus new HACCPAC mobile process
3. Hands on demonstration of HACCPAC Mobile
4. Why choose HACCPAC Mobile?

Introducing HACCPAC Mobile

- HACCPAC mobile provides electronic rosters and job verification for care workers
- Using a Smart Phone, workers can view their weekly roster, job locations, job start and end times and more.

Current Process Walkthrough

1. Rosters created using HACCPAC
2. Rosters printed and collated for each worker
3. Paper rosters sorted into workers trays/ pigeon holes
4. Paper rosters collected by workers
5. Paper roster taken onsite for clients to sign as required

Current Process Contd...

6. Additional information collated by workers, such as KMs, travel times, etc recorded in a log book
7. Roster changes are notated by workers on the paper form and or notes are attached (changes may have also been entered into HACCPAC at this time by HACCC Team)
8. Roster is returned to HACCC team for checking, and any updates are entered into HACCPAC

Current Process Contd...

9. Workers completed rosters for the period are collated
10. Paper rosters are filed
11. Paper rosters archived at later time.

V A D A

Current Process Contd...

The current process...

- Poses a risk to privacy
- Lacks security of data and personal details
- Is largely paper based and contains admin overhead
- Is prone to errors
- Offers little reporting and variance management.

New HACCPAC Mobile Process

1. Rosters are created using HACCPAC
2. Roster sync'd from database to mobile onsite by worker.
3. Using HP Mobile, worker records job start and finish time, and verifies using QR code
4. Worker records additional job information, e.g. KMs, travel time
5. Worker can also update roster as changes are made (optional)
6. Completed roster details are sync'd to the HACCPAC database on site by worker.

New HACCPAC Mobile Process

HACCPAC Mobile offers:

- Excellent security measures
- Improved privacy
- Improved Admin efficiency
- Less paperwork
- Automation reduces errors
- Provides effective reporting for improved management knowledge.

HACCPAC Mobile in Action

Demonstration includes

- Roster synchronisation upload
- Servicing a client end to end (including job verification)
- Cancelling a job
- Roster synchronisation – download
- Admin functions – job matching.

But ...before we begin.....

The Smart Phone

VADA

HACCPAC Mobile in Action - Recap

End to end demonstration including:

- Roster synchronisation upload
- Servicing a client end to end (including job verification)
- Cancelling a job
- Roster Synchronisation - download
- Admin functions – job matching.

HACCPAC Mobile in action

In addition to the demonstrated functions HPM includes:

- Weekly messages
- Optional ability for workers to add jobs to their rosters on the fly
- Ability to utilise the Smartphone device for other functions
- Mobile phone & SMS capability
- Keep in touch with the Workers more easily
- SMS & Email access
- Common process and tool for careers

The technical stuff

1. Smartphone:
 - Operating system – Windows Mobile 6.X
 - Requires a camera for QR code recognition
 - Does not require a mobile connection.
2. HACCPAC Mobile Sync Services application:
 - Requires a DB connection, and can be run on any PC (i.e. XP, Windows 7, etc.)
 - Sync via USB cable.
3. HACCPAC Mobile Job Matching Interface:
 - Must be installed in a PC that has HACCPAC installed.

Why HACCPAC Mobile

1. Multi -purpose device – HP Mobile, phone, SMS, data if desired.
2. Privacy – no paper rosters to sign
3. Environmental – reduced paper, environmental impact, reduced admin, filing and archiving
4. Total solution – not just Rosters or just job verification/ time logging
5. Upgrades/ customisation for changing needs
6. No device to leave in clients home, only QR code
7. No need to utilise client home telephone and raise concerns about phone bills etc.
8. Improved reporting - including exception reporting
9. Trusted local organisation – Vada Computing ☺
